## **New NHS Capital Funding – Barking, Havering and Redbridge CCGs and North East London NHS Foundation Trust**

Today we have announced a new hospital upgrade programme, making good on the 20 new upgrades the Prime Minister made on the steps of Downing Street - and I am delighted to inform you that your local area is one that is benefiting from today's announcement.

We want our NHS to deliver world class services in world class facilities. So as part of a further £1.8 billion package for hospitals, health hubs and more across the country, we are today unlocking the funding for the **St George's Health and Well Being Hub** scheme, with new investment of up to **£17m** which will deliver **a new health and wellbeing hub in North East London**.

Our renewed focus on NHS infrastructure will ensure the new nurses and doctors we're recruiting have the best and latest facilities possible, and that patients across the country are getting the world-class care on the ground.

Today's funding is important for the future of the NHS near you. But we know that there is more to do. So, we're also going to bring forward a new Health Infrastructure Plan that will deliver a strategic major hospital rebuilding programme - so we have the necessary health infrastructure across the country for the years to come. All this comes on top of the extra £33.9 billion a year we're putting into the NHS to secure its long term future.

I would of course be very happy to discuss this or any health matter with you, so we can make sure your local NHS is the very best it can be.

Yours ever,

**MATT HANCOCK**
